NUTRITION
FOR GROWING
CALVES

Barastoc Daisyvite[®] Calf Milk Replacer is specially formulated and quality checked to meet the nutritional requirements of calves of all ages from colostrum feeding through to weaning. Barastoc Daisyvite[®] has been formulated to improve feed efficiency and weight gain of post colostrum feeding calves and to provide extra protection at this critical stage of development. It contains a premium mix of protein, fat, vitamins and minerals with the added benefit of Rumensin[®]; to aid in the prevention of coccidiosis.

WHAT WILL IT PROVIDE MY CALF?

Protein	25% protein level derived from high quality, digestible sources of protein to support growth and development.
Prebiotics & Probiotics	Contains a mannan-oligosaccharide enriched yeast extract to enhance the growth of beneficial gut bacteria and a live yeast to help maintain beneficial gut flora and to optimise rumen function and nutrient absorption.
Vitamins & Minerals	Fortified with vitamins and minerals essential for healthy growth and development.
Rumensin[®]	As an aid in the prevention of coccidiosis caused by <i>Eimeria zuernii</i> and <i>Eimeria bovis</i> .

	PROGRAM 1	PROGRAM 2
Age	ONCE DAILY FEEDING Mix 300g of Barastoc Daisyvite [®] per litre of water	TWICE DAILY FEEDING Mix 150g of Barastoc Daisyvite [®] per litre of water
1 - 3 Days	Colostrum	Colostrum
3 - 14 Days	2.0 - 2.5 litres	1.5 - 2.0 litres
14 - 21 Days	2.5 - 3.0 litres	2.0 - 2.5 litres
21 Days - Weaning	3.0 litres	2.5 litres

The recommendations provided are intended as a guide only.

HOW TO PREPARE?

Mix 150 grams (feeding twice daily) or 300 grams (feeding once daily) of Barastoc Daisyvite[®] with 1 litre of water to obtain the correct concentration. Fill container with the required volume of clean water (use warm water), and slowly add the powder while stirring vigorously.
