THIS FEED IS UNSUITABLE FOR HUMAN CONSUMPTION.

This feed does not contain Restricted Animal Material.

The information provided in this specification is exclusive to the product identified and correct at the time of writing. The manufacturer accepts no responsibility if this feed is used in quantities, conditions or in any way other than in accordance with the manufacturer's recommendations.

HOW MUCH SHOULD I FEED?

Barastoc Rabbit Pellet is intended as a complete feed for rabbits at all life stages.

Rabbits should have access to a high quality roughage source such as hay or chaff to eat in addition to the pellets.

It is important to introduce Barastoc Rabbit Pellet gradually to their diet over 7 - 10 days.

It is important to keep feed fresh - replenish each day.

Ensure fresh, clean drinking water is available at all times.

GROWING RABBITS

Introduce Barastoc Rabbit Pellet gradually 2 weeks prior to weaning and feed to appetite until desired body condition score achieved. Once reached adjust feeding rate accordingly.

PREGNANT AND LACTATING DOES

Barastoc Rabbit Pellet may be fed up to 160grams per head per day while pregnant and then to appetite once they have given birth to their kits and are nursing them. As a guide lactating does will consume approximately 350grams per head per day. Once kits have been weaned, feeding of does should be adjusted down to achieve the desired body condition score.

DRY DOES AND BUCKS

Feed up to 100 grams per head per day. Monitor body condition score and adjust feed intake if necessary to keep this in the desired range.

STORAGE REQUIREMENTS

Store under cover in a cool, dry place below 30°C and protected from exposure to direct sunlight.
